

Atos Unify Ready Technology connectivity certification

The connectivity of

Poly Voyager 5200 series

developed by Poly has been certified at the Bluetooth Interface for usage with Atos Unify OpenScape DeskPhone CP600 in accordance with the respective test report, dated December 13th, 2019

The test was conducted conforming to DIN EN ISO 9001. Please consider that Atos Unify headset certifications are restricted to functional tests and the certificate is therefore only valid with the full test report and the notes and limitations contained therein. **The supplier of the certified product confirmed in their declaration of conformity that the product is in line with all compliance regulations (e.g. "acoustic shock") and is responsible to perform appropriate acoustical tests for the mentioned products via the relevant interfaces. Therefore, the certificate and test report are not good for a statement of acoustical functionality or quality.**

Poly Voyager 5200 Family

Notice Regarding Sync Product Family functional equivalence statement

To Whom It May Concern,

This note is intended to give guidance to partners and customers wishing to qualify the Poly Voyager 5200 line of products for use with their Software or Hardware clients using USB Human Interface Device Specifications

All members of the Poly Voyager 5200 Family run common software and support the same USB Human Interface Device Specifications.

At time of writing these products are:

- Voyager 5200 UC
- Voyager 5200 Office

The USB Human Interface Device Specifications are identical between all members of the family. Variations in performance between family members may be experienced due to one or more of the following differences:

1. Physical user interface and connectivity *differences* (e.g. One-way base or Two-way base, USB-A or C connector, Telephone interface or EHS cable, Poly or Microsoft Team's version...)
2. Usage model differences (Wireless Range, ...)

For USB Human Interface Device Specifications interoperability with Software or Hardware clients, testing on one product (e.g. Voyager 5200 Office Series One-way base) can be used as representative of the performance of the entire product family.

Poly tests the full range of products through a thorough regression test cycle on each feature release, and appropriate levels of regression testing for patch releases. Poly will support customers using the most recent feature release and one prior feature release at the latest patch level.

For details on which products are supported on which software release please refer to the Poly Support Website: <https://www.poly.com/us/en/products/phones/portable-speakerphones>
