

Atos Unify Ready Technology connectivity certification

The connectivity of

Savi W700 Series

developed by Poly has been certified at the Headset Interface for usage with Atos Unify OpenScape DeskPhone CP Phones in accordance with the respective test report, dated July 17th, 2019

The test was conducted conforming to DIN EN ISO 9001. Please consider that Atos Unify headset certifications are restricted to functional tests and the certificate is therefore only valid with the full test report and the notes and limitations contained therein. **The supplier of the certified product confirmed in their declaration of conformity that the product is in line with all compliance regulations (e.g. "acoustic shock") and is responsible to perform appropriate acoustical tests for the mentioned products via the relevant interfaces. Therefore, the certificate and test report are not good for a statement of acoustical functionality or quality.**

Munich, November 19th, 2021

Director Technology Partner Program

Poly Sync Family

Notice Regarding Savi 700 Product Family functional equivalence statement

To Whom It May Concern,

This note is intended to give guidance to partners and customers wishing to qualify the Poly Savi 700 line of products for use with their Software or Hardware clients using USB Human Interface Device Specifications

All members of the Poly Savi 700 family run common software and support the same USB Human Interface Device Specifications.

At time of writing these products are:

- Savi 710
- Savi 720
- Savi 730
- Savi 740
- Savi 745

The USB Human Interface Device Specifications are identical between all members of the family. Variations in performance between family members may be experienced due to one or more of the following differences:

1. Physical user interface and connectivity *differences* (e.g. Over-the-head (Monaural or Binaural), Over-the-ear or Convertible...)
2. Usage model differences (talk time, weight, ...)

For USB Human Interface Device Specifications interoperability with Software or Hardware clients, testing on one product (e.g. Savi 540) can be used as representative of the performance of the entire product family.

Poly tests the full range of products through a thorough regression test cycle on each feature release, and appropriate levels of regression testing for patch releases. Poly will support customers using the most recent feature release and one prior feature release at the latest patch level.

For details on which products are supported on which software release please refer to the Poly Support Website:
