

Atos Unify Ready Technology connectivity certification

The connectivity of

Jabra Engage 50 II (UC Variant)

developed by Jabra has been certified for usage with following: Atos Unify OpenScape UC Desktop App in accordance with the respective test report, dated January 23rd, 2023. Based on the similarity statement from Jabra both variants Mono and Stereo and USB-A/USB-C variants are certified by testing only one of them.

The test was conducted conforming to DIN EN ISO 9001. This certificate is only valid in conjunction with the full test report and the notes contained therein. The supplier of the certified product confirmed in their declaration of conformity that the product is in line with all compliance regulations (e.g. "acoustic shock") and is responsible to perform appropriate acoustical tests for the mentioned products via the relevant interfaces. Please consider that the test report only covers the functionality of the interface. The certificate and test report are not good for a statement of end-to-end functionality.

Jabra Engage 50 II – Declaration of Similarity

It is hereby declared:

Jabra Engage 50 II UC headsets are available in Stereo and Mono versions and each version is also available with either USB-A or USB-C connectivity. Users can choose versions bundled with controllers that connect to the headset via USB-C, or choose to have headsets without bundled controls. The versions with the bundled controllers are identified with “Engage 50 II Link” in the product descriptions.

In every case, the headsets support USB connection to a PC running a soft client such as Unify OpenScape UC. The headsets with controllers support standard call controls, including answer, end and mute, and have a volume wheel to adjust headset audio volume. Controllers also have two additional buttons, one of which is used to manually toggle the headset busy light on or off. The other button has no assigned function in the out-of-box state, but can be configured through the Jabra Direct application, or via an integration of the Jabra SDK in third-party software.

All Engage 50 II headsets use identical firmware.

When connected via USB to a PC running Unify OpenScape UC or similar, functional behavior of all Engage 50 II headsets is identical.

The mono and stereo headsets for Engage 50 II are the same and as such, except for the difference inherent in mono and stereo products, there will be no other difference in audio performance between the models.

EU Declaration of Conformity

GN Audio A/S declare that this DoC is issued under our sole responsibility and belongs to the product identified as:

Jabra Engage 50 II and 50 II Model: HSC160, ENC160
Link
(Corded headset, controller)

The product described above is in conformity with the relevant Union harmonisation legislation:

- 2011/65/EU of June 8th, 2011 (the RoHS directive, including all amendments as on date),
- 2014/30/EU of February 26th, 2014 (the EMC directive, including all amendments as on date).

The following harmonised standards and technical specifications have been applied:

EMC EN 55032 (2012), EN 55035 (2017)
RoHS EN 63000 (2018)
